

I am not a big user, total amount of saving is not significant ?

We feel and suggest :

- 3) Cost saving is only 1 of the reason, Contributing and being Eco-friendly is our duty and responsibility for future generation. We can save both our pockets and the earth all together.
- 5) Due to the LONG service Life of LED technology, maintenance and replacement cost of conventional lights are often hidden and difficult to determine.
- 7) It is always human nature to advance and improve as a style in quality living, environment lightings is one of them.
