

## Why Do We Want To Use LED Lights ?

### A) Environmental Reasons

Reduce Energy Consumption

Reduce Co2 Emission

Reduce Wastage Creation  
(Long Working Life)

Clean Production Process

### B) Personality and Trendy

LEDs are more  
Stylish

Allows for Full  
variations of colors

No blinking start\slow  
bright

Blend perfectly into  
New Structures

## Why Do We Want To Use LED Lights ?

### C) Monetary Cost Savings

Averagely reduce 50-60% of Electricity consumption

Working Life time up to 3 times normal energy savings Bulbs

Surface Heat produced is 20% of conventional Spot lights thus saving on air-condition system

Simple\Easy installation

### D) Manpower For Maintenance

Longer working life = Lesser replacement job

Simple components \structure = lesser parts to change

Much higher Safety factor without glass and gas

Lesser Wastage = a full pipe of lesser jobs
